Summary

Aspiring Software Developer with hands-on experience in full-stack web development, cloud technologies, and scalable application design. Proficient in Java, JavaScript, and Python with experience building responsive web applications and RESTful services.

Strong understanding of user-centered design, UI/UX principles, and modern frontend frameworks. Passionate about developing cloud-native solutions and contributing to enterprise-grade systems

Skills

• Programming Language: Java, JavaScript, Python • Frontend: HTML, CSS, Vue.js , React.js , Bootstrap • Backend: Spring Boot, FastAPI • Cloud & Tools: AWS, Git, GitHub

Education

Bachelors of Science in Information Technology | CGPA - 8.41

Jun 2023 - May 2026

Rathinam College of Arts and Science, Coimbatore

Higher Secondary School | Percent - 87

Jun 2022 - May 2023

Arokiamatha Higher Secondary School, Coimbatore

Certifications and Training

- Python certified in FreeCodeCamp
- Responsive Web Design on FreeCodeCamp
- UI/UX certified by miyam
- Software Development by DATACOM

Project Experience

E-Commerce Web Application – RIYA FASHION

- Managed a dynamic catalog of **50+ products** across **5 categories** using Vue.js.
- Optimized image loading and state management, reducing initial page load time by **20%**.
- Developed a search algorithm that handles **multiple filter parameters**, improving user navigation speed

Car Rental Management System

Tech Stack: Java, OOP (Classes, Objects, Encapsulation)

- Designed a system capable of managing a database of **100+ vehicle records** and customer logs.
- Implemented strict encapsulation and validation logic, reducing data entry errors by **30%**

Euron – Mental Health Chatbot

Tech Stack: Python, FastAPI, LangChain, GROQ API

- Leveraged GROQ API and LangChain to achieve response latencies under **200ms**
- Processed and indexed **10+ mental health resource documents** for context-aware querying.
- Reduced API token usage by **15%** through optimized prompt engineering and LangChain memory management
